

Poly/plastic shell:

Gently wipe off any spill or debris. After, dip a lint-free cloth into a mild soap and water mixture. Scrub gently over the stained area. For tougher stains, you may use distilled vinegar and a lint-free cloth. Repeat if needed.

Standard upholstery:

Vacuum up any excess dirt/spillage with close attention to the seams, area where the seat meets the back and area where the arms meet the seat/back. After, take a lint-free cloth and dip it into any water-based cleaning agent. Scrub gently over the stained area. Repeat if needed. For best results, follow the mill guidelines for your exact textile.

Leather upholstery:

Keep leathered upholstery out of direct sunlight so the material doesn't dry out and fade/crack. Cleaning leather upholstery is easy and can be done in 3 different ways:

- rubbing alcohol and water,
- actual leather cleaner you find at a store (always test a small area first),
- vinegar and linseed oil.

Use a lint-free cloth. Damp it into your cleaning agent and gently scrub the stained area. Use a dry, lint-free cloth to dry the area. Repeat if needed. For best results, follow the mill guidelines for your exact textile.

High-performance mesh:

Mix mild soap and warm water together and using a lint-free cloth, damp it a little bit into the mixture. Dab gently where the stain is located. Use a different, dry, lint-free cloth to dry the area. Repeat if needed.

Copper mesh:

To prevent overall soil, frequently vacuum and lightly brush the best to remove dust and grime buildup. Spot clean with mild soap and water. Infrequent use of a 1:100 bleach to water solution can be used for disinfection of the mesh. The accumulate wet contact time should be limited to a maximum of two hours over the life of the chair. Regular bleach cleaning of this mesh is not recommended.

The following cleaners have been successfully used with Copper Mesh. Please note, Ergify does not endorse any of these cleaners. For details, please contact these cleaning product manufacturers directly.

1. CLOROX® Broad Spectrum Quaternary Disinfectant Cleaner
2. CLOROX® Healthcare bleach germicidal cleaner
3. CLOROX® Dispatch
4. CLOROX® Clean-Up® Disinfectant Cleaner with Bleach
5. ECOLAB ASEPTI-WIPE-II
6. GOJO PURELL® Healthcare Surface Disinfectant
7. METREX Cavicide™
8. METREX Envirocide™

To best maintain your casters:

To get the most out of your casters, it is always good to keep them as clean as possible. Once a month, gently flip your chair over and carefully use tweezers to remove all dirt/hair/debris out of the creases of the caster.

Use a lint-free cloth with your preferred cleaning agent and clean the caster thoroughly. Thoroughly dry the caster with another lint-free cloth after.
